You can register your request for our services and we will iron out your problem using our expertise. We are welcoming projects in DevOps automation, On-premises to AWS Cloud Migration, AWS Cloud Managed Services. Managed IT Services for Open-Source distributions and tools. The complete IT audit framework for your IT Infrastructure consist of Monitoring, Backup, Logs, HA/DR, Patching, Operating system and Network Security compliance.

- **Modernize the Data Migration Services Quicker, Simpler, and Safer – Reinventing Cloud Computing**
We offer a newer, more efficient way to transfer your databases and applications to the cloud. Our effective data migration strategy will empower seamless data transfer from legacy systems to cloud platforms, which minimizes downtime.
- **Find Real-Time Insights with Centralised Log Management (ELK)**
With Informatrix, enter into the world of data-driven components. An effective centralized log management system makes it easy to process, analyze and evaluate large volumes of data logs easily.
- **IT Tools You Can Not Overlook! Redefine the Way for IT monitoring with Informatrix IT.**
We implement IT infrastructure monitoring tools, like Nagios, Zabbix, Prometheus&Grafana, Datadog, and others, to provide real-time visibility into your system's performance, enabling efficient resource management and issue detection.
- **Level Up Your IT Infrastructure with DCIM (Data Centre Infrastructure Management Software) - A Better Way of Security and Sustainability**
Infomatrix comprehensive DCIM (Data Centre Infrastructure Management) software solutions assists in efficiently monitor, manage, and optimize your data centre operations with real-time visibility, streamlined workflows, and effective resource utilization.
- **Simplify your Customer HelpDesk Actions by Ticketing System**
Our experts leverage high-tech tools like OS Ticket, SNOW, and JIRA to automatically organize and prioritize support requests and customer issues in a central dashboard.
- **Reinventing the DevOps to Automate the Configuration Management**
Infomatrix experts helps in improving your operational efficiency by utilizing advanced configuration management tools like Ansible, Puppet and Chef for your business' infrastructural management.
- **Get Your Software Developed and Automated Incrementally and Iteratively**
For CI/CD processes, we utilize robust tools like Jenkins, GitLab, and Travis CI to improve software development and deployment cycles for efficient and reliable delivery.

Unleash the Best Practices in the Development of Workflow till its Deployment

Our experts leverage the GitOps tools like Agro CD to manage IT infrastructure applications and automate software delivery. Agro CD enables continuous delivery and deployment of applications in the Kubernetes environment.

Minimizing the IT threats with OS Management Hardening and Patching

Explore extensive Linux OS Management services, and strengthen your organization with robust security measures, vulnerability assessments and penetration testing (VAPT), and efficient patch management to improve your system's resilience against threats.

Get Your System Backed Up with High Availability and Disaster Recovery Clusters

Our experts will assist in safeguarding your critical systems and data from unexpected disruptions by implementing comprehensive solutions in High Availability and Disaster Recovery Clusters.

Automate Your IT Operations through Software Development Life Cycle (SDLC)

Revolutionise the way you develop software applications with Infomatrix experts. We integrate automated tools and processes throughout SDLC to streamline and accelerate development.

Discover a Secure Private Network – Manageable and Affordable with Informatrix

Improve your business operations efficiency with a robust and reliable network with Virtual Private Network (VPN). We utilize OpenVPN to safeguard and encrypt communication channels between remote devices and network.

Delve Deeper into the Four Tier of IT Infrastructure with Informatrix

We optimize your business operations and enhance efficiency by implementing four-tier architecture - a robust framework ensuring seamless connectivity and superior performance across load balancers, web, application, and data servers.

Securing a Strong Connection Between Server And Client With SSL Integration and Management

Informatrix provides efficient SSL integration and management to develop a safe and secure website to improve SEO rankings and protect businesses' sensitive data.

Established in 2009, Informatrix IT Solutions Private Limited was launched to help organisations fill in the knowledge gap in their businesses. As experts in information technology, we provide comprehensive IT consulting and business development services. Our services are designed to help you upgrade your business application, IT infrastructure and boost the efficiency of your business.

Centred in one of the fastest-growing cities in India, Informatrix launched its technical training centre in 2009. The Technical Training Centre trains over 400 exceptional IT professionals every year, teaching them skills including Salesforce, DevOps, Cloud Computing, OpenSource Tools and the latest IT technologies.

Through perseverance and dedication, Informatrix also launched our technical forum in 2016, allowing professionals to network without bounds and find help in overcoming IT challenges. We have worked with over 100+ customers in the past 12 years, going above and beyond for their satisfaction.

Our expertise ranges across a range of popular technologies and programming languages. However, what sets us apart from other IT development and consulting services is our expertise in the following:

01 **AUDIT & COMPLIANCE**

Auditing is essential for assessing the current status of your applications, systems, and networks to evaluate their performance to ensure efficiency, effectiveness, and compliance. Informatrix audit experts will leverage industry knowledge to design, implement, and maintain a rigorous internal audit program for your business to meet regulatory compliance and client needs.

02 **DEVOPS**

DevOps combines software development and IT operations to reduce the timeline of a project. Our experience with DevOps ensures the project's timeline is shortened and your project is completed within no time.

03 **CLOUD COMPUTING**

Cloud is the latest technology taking the IT industry by storm. Our 10+ years of experience with the Cloud ensures you can transform from an in-house architecture system to a cloud-based system without losing your efficiency.

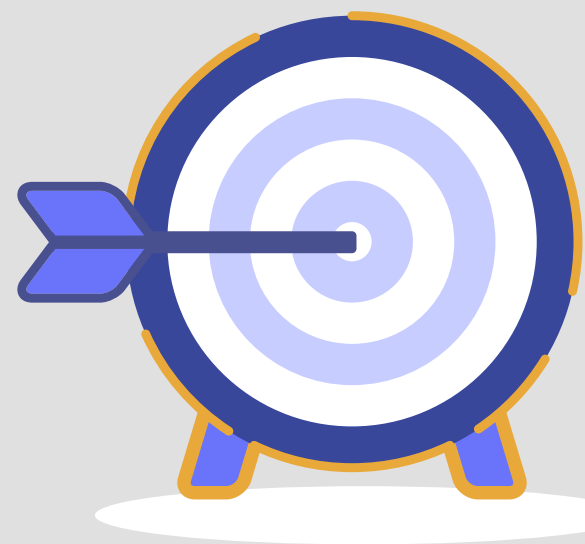

04 **OPEN SOURCE TOOLS**

Open Source Tools are a developer's lifeline. Our comprehensive experience with a range of tools will benefit your business. We have expertise in Nagios, ELK Stack, OSTicket.

Integration

Specialization integrating opensource tools to create impact on modern technologies
The tools we hold expertise on are as follows:

MISSION

We are on a mission to provide realistic, transparent and affordable services to our clients. With each project we take on, we aim to deliver quality services with superior values, so you are never disappointed. We integrate new solutions, out-of-the-box ideas and our expertise to provide all shareholders in the project with the best solution.

VISION

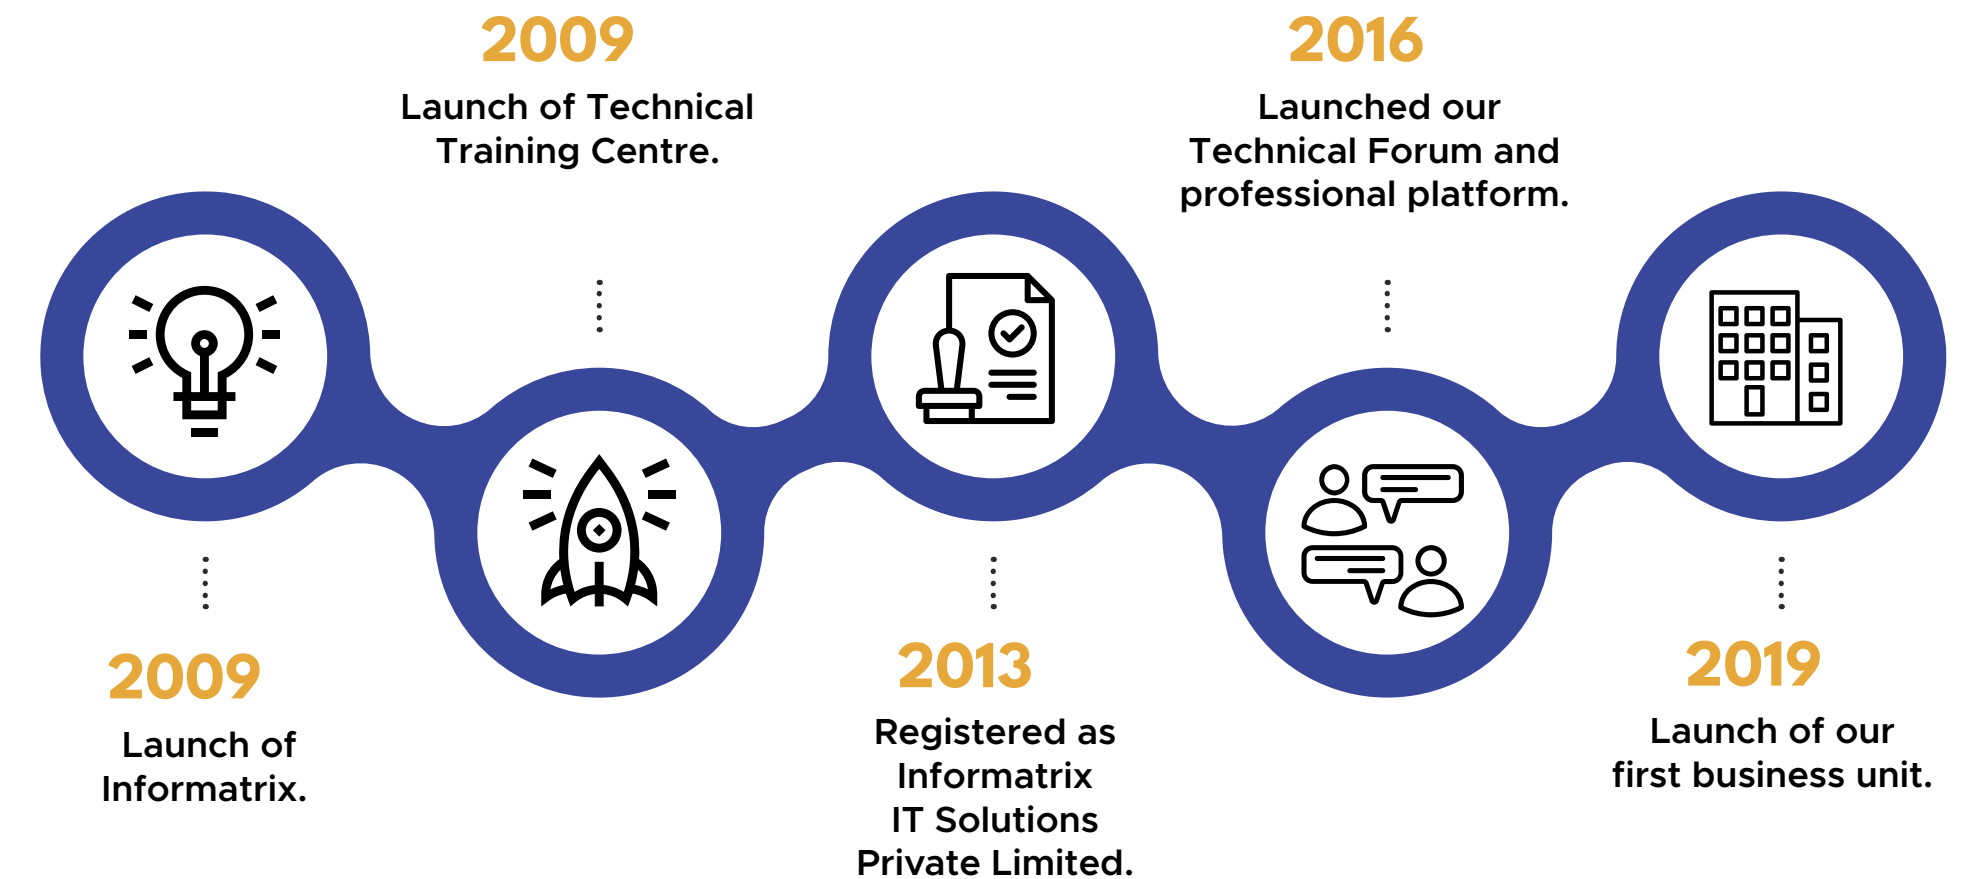

While Informatrix is 10+ years old, our work has only just begun. Our vision is to become an unparalleled resource in the IT industry. By employing services that fit the client's brief exactly, our vision is to become irreplaceable for your business.

Testimonials

Extremely impressed with the services of Informatrix. We were unsure what problems our platform faced and decided to hire Informatrix to determine the problem. They provided a fast response, got to work immediately, and we haven't faced the problem since.

Informatrix is a service I would recommend. Experienced, professional, and honest. They were able to integrate the CRM without any hassle. Business operations continued as normal. Thank you for making the transition so smooth.

A huge thank you to the team at Informatrix, especially Mr Chandan Singh, who was the lead on the project. We were able to transition to Cloud without any hassle, thanks to your experience.

I've worked with Informatrix on and off for almost two years and would recommend this service to you. They know what they are talking about and don't recommend solutions just for the sake of it. Instead, they complete thorough analysis and provide data-driven recommendations.
